MATH 429/629 INTRODUCTION TO BAYESIAN STATISTICS (SPRING 2019)

Please complete exercises Ch.11 #2,3,5 C1-C8 in Bolstad & Curran. I selected these problems to give deliberate practice towards mastering learning outcome 3 — *students will conduct Bayesian inference for parameters of discrete and continuous random variables*. All exercises provide practice evaluating approaches to estimate and test hypotheses for the Normal mean parameter. This homework features several computer exercises to help you build intuition rapidly. Please include the R code you used in your report instead of saying something like “I used R” or just reporting output.

Point value label	Needs Improvement	Approaching standards	Meets standards	Exceeds standards	NA	
<b>1. Explanation and justification</b>	Explanation is difficult to understand and is missing several components OR was not included.	Explanation is a little difficult to understand, but includes critical components.	Explanation is clear.	Explanation is detailed and clear yet concise.	2	
<b>2. Mathematical accuracy</b>	More than 25% of computations/statements have errors in selected problems.	Most (75%-89%) of computations/statements are free of errors in selected problems.	Almost all (90%-99%) of computations/statements are free of errors in selected problems.	All of computations/statements are free of errors in selected problems.	2	
<b>3. Completion</b>	Several problems are not completed.	All but two of the problems are completed.	One problem not completed.	All problems addressed.	1	
<b>4. Neatness and organization</b>	The work appears sloppy and unorganized. It is hard to know what information goes together.	The work is presented in an organized fashion but may be hard to read at times.	The work is presented in a neat and organized fashion that is usually easy to read.	The work is presented in a neat, clear, organized fashion that is easy to read.	1	
<b>5. Mathematical terminology and notation</b>	There is little use, or a lot of inappropriate use, of terminology and notation.	Correct terminology and notation are used, but it is sometimes not easy to understand what was done.	Correct terminology and notation are usually used, making it fairly easy to understand what was done.	Correct terminology and notation are always used, making it easy to understand what was done.	1
