

Name (Student evaluator):

Project members:

Total score (out of 12):

Critical task	Needs improvement (1)	Basic (2)	Surpassed (3)
<b>Analysis.</b> Choose and carry out analysis appropriate for data and context. <b>MUST USE BAYESIAN STATISTICS!</b>	Choice of analysis is overly simplistic, irrelevant, inappropriate for the data, or missing key component(s)	Analysis appropriate, but incomplete and important features and assumptions not made explicit	Analysis appropriate, complete, advanced, relevant, and informative
<b>Synthesis.</b> Identify key features of the analysis, and interpret results in context	Conclusions are missing, incorrect, or unsupported	Conclusions are reasonable, but partially correct or partially complete	Relevant conclusions explicitly connected to analysis and context
<b>Visual.</b> Communicate findings graphically clearly, precisely, and concisely	Inappropriate choice of plots; poorly labeled plots; plots missing	Plots convey information correctly but lack context for interpretation	Plots convey information correctly with adequate and appropriate connections
<b>Written.</b> Communicate findings in writing clearly, precisely, and concisely	Explanation is illogical, incorrect, or incoherent	Explanation is partially correct but incomplete or unconvincing	Explanation is correct, complete, and convincing.
